

ANACONDA

—“from mine to finished product”

Anaconda has in operation at its raw material source, an extensive and thoroughly up-to-date mill, and is prepared to offer all kinds of hot rolled copper rods, bare wire, strand, trolley wire, telephone and telegraph wire. All operations from mine to finished product are under Anaconda supervision. This means superior quality—quick shipments.

Anaconda copper products are made from the well known B & M brand of electrolytic copper containing less than 1-100 per cent of metallic impurities.

Purity and fewer brazes per mile make Anaconda Trolley Wire what you need.

Anaconda Trolley Wire always complies with or exceeds A. S. T. M. Standards.
