

HARNESSING *the* MOUNTAIN to Conquer the Mountain

THE mountains, for years almost impassable barriers to transportation, have been made to yield their limitless store of energy to the service of man.

The tremendous forces of mountain torrents have been fitted to the yoke of achievement and now furnish the power that hauls the great all-steel trains of the "*St. Paul Road*" across the backbone of the continent—440 miles through the Belt, Rocky and Bitter Root Mountains. An additional 211 miles is being electrified through the Cascade Mountains in Washington.

When next you journey to the cities of the Pacific Northwest travel electrically on either of those famous trains "*The Olympian*" or "*The Columbian*."

Mountain travel without cinders—without jar or grinding brakes. Snow-clad vistas unobscured by trailing smoke, via the

Chicago, Milwaukee & St. Paul Railway

Electrification literature giving full particulars of this momentous achievement sent on request to
