

PACIFIC LINE FOR ST. PAUL ?

Report of Surveys for Road Through to
the Coast.

Special to The New York Times.

OMAHA, Neb., Dec. 1.—Reports reached Omaha to-day that a corps of Chicago, Milwaukee and St. Paul Railroad engineers is in the field surveying a line to the Pacific Coast. James Allen, a big rancher from Northwest Wyoming said:

“The road has engineers at work surveying a line from west to east through Wyoming. The survey passes through my ranch, and the workmen were at my place several weeks. My ranch is immediately south of Yellowstone Park in Wyoming, and almost due west of Chamberlain, S. D., to which point the surveyors were working.”
