

Cornell's Frolaset Corsets Laced Front

The secret of smartness in dress lies in the elimination of the unessentials. Cheruit, the noted Parisian modiste, once advised a slender woman that her thinness ought to be more accentuated. The adoption of simplicity in one's gown often turns an insignificant figure into one of marked distinction and smartness. We know of no corset of which we can speak as favorable as we do of the new models of Frolaset front-laced corsets.

\$3.50
UP TO
\$15.00

Shown in a Full Range of Fashionable Models

You will like the new Frolasets. The lines are classic. The straight hip effect and smooth, graceful back are simply beautiful; not even the slightest nip at the hip.

The abdomen is well taken care of. And still not one bit of comfort is sacrificed. Any position may be assumed with perfect ease and beautiful lines remain.

AROUND THE STATE

EIGHT SURVEYING PARTIES WORKING FOR GOVERNMENT

Helena, May 24.—Eight parties are now in the field at work on 1,900,000 acres of land the government proposes to survey in Montana this year. It is the intention, says J. Scott Harrison, assistant supervisor of surveys, to put at least two more public land survey crews in the field and from two to four special parties in the forest reserve, providing engineers can be found who are competent to take charge of them. The register of the civil service has been exhausted and now, unless special authority is obtained to employ more engineers, it will be impossible to put more crews in the field. About 200 engineers took examination, but only 19 qualified. Some who failed are said to be competent to do the work, but they fell down when it came to theory. Plans have been made to survey approximately 1,038,560 acres of public land and 875,520 acres of Northern Pacific lands. The railroad has made deposits to defray the cost of the work. Most of the work will be carried on in the western part of the state, where lands listed for the last three years for survey were temporarily passed in favor of lands in Eastern Montana. The Eastern Montana appropriation has been exhausted and now that part of the state will be on the same basis as the western part. In 1912, 2,400,000 acres were surveyed in Montana.

LIVINGSTON NEWS.

Livingston, May 24.—Eva Barton has begun suit in the district court for a divorce from Charles W. Barton, alleging failure to provide and Intemperance. The couple were married in this city Jan. 4, 1901. They have one child, adopted, aged 7. Reports from the upper Yellowstone and Shields valleys declare that the spring crops are practically all in and that ranchers are now getting ready to put in their potatoes. All the county has enjoyed more rain than ever before during the spring and present indications are that there will be a good crop. That the railroad is expecting there will be a large acreage and yield this year is indicated by the fact that they are getting a larger number of engines and boxcars ready for the fall business than in years past. The shops are running on full time and with full force. The jury in the case of Charles Bruckert against A. W. Chadbourne, in which the plaintiff sought \$500 for damages to his fax crop by cattle trespassing, brought in a verdict at 8 o'clock tonight for \$20 damages.

At the Railway clubrooms Tuesday night there will be an address by George T. Conley, fuel supervisor for the Northern Pacific, from St. Paul. He will talk on the question of fuel economy and an engine on the Montana division will give a talk on the same question from the standpoint of the engineer. Simon Plesin of Jardine was killed three hours during the past week. Two were of the black variety and one was brown. Two were trapped, but the third was killed after a fierce encounter when he looked back of him as he heard a noise and saw the bear coming for him. He shot, but only wounded him by breaking his back and who, angered by the shot, made a desperate charge for the man. Another bullet behind the ear as the bear was within 10 feet of Plesin finished him. This made the eleventh bear the man has killed. Bear meat has been the chief article of diet about Jardine since Plesin got busy.

THREE MORE TOWNSHIP SALES HELD AT LIVINGSTON

Lewistown, May 24.—The sale of the Milwaukee Land company's townships of Winifred, Suffolk and Heath, the former of the Hillier extension and the latter on the main line east, were sold here this afternoon, fancy prices being realized. These are the last township sales the company will hold here, making 15 in all.

INDISPENSABLE TO ALL WHO OWN AUTOMOBILES

The official tour book of the Montana Automobile association is off the press and will be on sale in two or three days. Every possible care has been taken by the publisher in covering the ground to select the best of the roads and to describe them accurately. In covering the information contained in the tour book is of the dependable and proved variety, the motorist may safely surrender himself to the charm of touring through beautiful Montana, where nature has been so generous in providing magnificent scenery for the pleasure of man. Practically all the main traveled roads throughout the state are covered so thoroughly that any one may travel from place to place without a pilot. Each route is so accurately described that any novice who can read can follow the right road. The strip maps were compiled by Rudolph Barick, a member of the engineering department of the Anaconda Copper Mining company. The tour book contains plates covering three-fourths of the area of the entire state and shows 2,500 miles of county roads. Many of the maps show section lines one mile apart in fine dotted lines, providing a quick and ready means of calculating short distances, as well as locating landmarks, making the guide of great value to land agents, real estate men and others. Lakes, streams and other points of interest are also shown. The opening pages of the book contain strip maps and logs of West-gard's "Northwest Trail," beginning where the trail enters the valley of the Yellowstone river, near Beach, N. D., following that stream via Miles City to Billings, Livingston and Bozeman, through the Gallatin valley and on through Pipestone pass to Butte; thence on to Anaconda, Deer Lodge, Missoula, Ravalli and Thompson Falls to the Montana-Washington state line. There are five maps of Montana's famous playgrounds, Yellowstone and Glacier National parks. The book contains nearly 70 maps, is printed on heavy, russet-colored, bond paper, and sells at \$1.50 per copy. The edition is limited and orders will be filled as they come in as long as the edition lasts. In order to secure prompt attention, address orders and remittances to Road Map Department, Montana State Automobile association, Box 636, Anaconda, Mont.

OPINION OF IMPORTANCE TO TEACHERS RENDERED

Helena, May 24.—Attorney General Kelly rendered an opinion today in response to a query from C. A. Linn, county attorney of Meagher county, to the effect that teachers, to be sure of their positions, must have written contracts. The question arose where the board of trustees in Meagher county elected a teacher for the next year who is at the present time teaching his first year. The clerk upon orders from the board gave him written notice of his election and the teacher accepted in writing. No formal contract in writ-

MARRIAGE OF PROMINENT YOUNG BOULDER COUPLE

Boulder, May 24.—The marriage of Miss Elsie Eleanor Halford to Philip Charles Smith was solemnized at the home of the bride's parents, Mr. and Mrs. Dan M. Halford, at noon today. The Rev. Father Thomas Jovce, pastor of St. Catherine's Catholic church, reading the lines that pronounced them man and wife. The bride was attired in a beautiful wedding gown of white silk charmeuse. After congratulations and felicitations the company sat down to an elegant luncheon. Owing to the recent severe illness of the groom's father the wedding was a very quiet one, only the immediate

USES OF GROUND MICA.

From the Indianapolis News. Large quantities of scrap mica—small sheets and the waste from the manufacture of sheet mica—are ground for different uses, among which are the decoration of wall paper and the manufacture of lubricants, fancy insulations, according to government geologists. Ground mica applied to wall paper gives a silvery luster. When mixed with grease or oil, finely ground mica forms an excellent lubricant for axles and other bearings. Mixed with mica is used as insulators for trolley wires. Ground mica for electrical insulation must be free from metallic minerals.

MINERS' HOLIDAYS.

From the New York Sun. "Holidays are the most aggravating of all obstacles to the continuous operation of an anthracite coal mine," said Capt. W. A. May, general manager of the mines of the Pennsylvania Coal company, in and about Dunmore, Pa., a suburb of Scranton. "We have all 67 varieties and then some out here. Strikes, floods and cave-ins, things the public hears of in connection with suspension of work in the mines, are matters we are thoroughly well prepared to cope with. But we never can tell when a miners' holiday is coming, nor how many men it will affect until it is time for a new shift to go to work." The Pennsylvania Coal company has miners of 23 nationalities on its pay rolls. Each of these has holidays peculiarly its own. There are 12 legal holidays in Pennsylvania, two of them election days, in February and November, and every Saturday afternoon is a legal holiday. Besides these Polish Catholics have nine holidays, Greek Catholics 10, French and French Canadians from three to five, Jews of various nationalities from six to eight, Lithuanians

INTRUDING CATTLE GO BACK TO CANADA

Judge Bourquin handed down a decision yesterday as soon as he heard the testimony in the case entitled the United States against 55 head of cattle. The title may sound like a joke, but it isn't. Eighty-five head of cattle that were being ranged in Canada, near the American border, not having read the Payne-Arden tariff act or maybe having heard of the proposed measure lifting the tariff on livestock, wandered over the border. They were seized by vigilant government inspectors. The Canadian owners pleaded that they were not to blame, as the cattle wandered off and started for the United States without their knowledge or consent. The judge took the word of the owners for it and let them have the cattle back. Honor Williams, aged 77 years, died early yesterday morning at the home of her son, Samuel Williams, 527 1/2 South Dakota street. The body was removed to White's undertaking parlors and will be shipped to Bald Mountain, Col., where interment will be made.—Adv.

PINEAPPLE PAPER.

In an experimental way a tough paper, suitable for insulation purposes, is being made at Boston from the fiber of Hawaiian pineapple leaves.

SUPPLY DECREASING.

Germany's animal census shows that the number of beef cattle, calves and sheep has decreased since 1907. The decrease in sheep amounting to 25 per cent.
